ABOUT ME

[HOME](#)[EDUCATION](#)[PORTFOLIO](#)[CONTACT](#)

When I'm not immersed in coding or bringing designs to life, I enjoy diving into activities that keep both my mind and body active. You'll often find me strategizing over a challenging game of chess, exploring new tactics and testing my problem-solving skills on the board. On the field, I love kicking a soccer ball, whether it's a casual game with friends or simply honing my footwork and agility.

As a passionate football fan, I never miss an opportunity to cheer for my favorite team, Arsenal. From thrilling match-day victories to the emotional rollercoaster of the sport, being part of the Gunners' global community fuels my love for the game.

Beyond sports, I have a deep appreciation for the power of stories. I'm an avid reader who enjoys exploring different worlds and perspectives through books. Among the many stories I've encountered, *The Book Thief* holds a special place in my heart for its poignant narrative and unforgettable characters. It's a reminder of the profound impact that words and resilience can have, even in the darkest times.

EDUCATION AND CV

[HOME](#)[ABOUT ME](#)[PORTFOLIO](#)[CONTACT](#)

Education

Addis Ababa Institute of Technology (AAIT)

Bachelor of Science in Software Engineering

Expected Graduation: 2027

Currently pursuing a rigorous 5-year program at AAIT, one of Ethiopia's leading engineering schools. As a 3rd-year student, I have developed a solid foundation in software development, with hands-on experience in programming, design, and problem-solving. My coursework and projects reflect a growing expertise in both theoretical and practical aspects of software engineering.

Certifications

Programming Fundamentals Nanodegree Udacity

Gained proficiency in web programming and developed practical skills in HTML, CSS, and JavaScript.

Object-Oriented Programming in Java

University of California, San Diego (Coursera)

Mastered core concepts of object-oriented programming and applied them to develop robust Java applications.

PORTFOLIO

[HOME](#)[ABOUT ME](#)[EDUCATION](#)[CONTACT](#)

Chess Game

A two-player computer game developed using Java.

This project involved designing and implementing a strategic chess game with user-friendly functionality, enhancing my skills in object-oriented programming and logic development.

Hangman Game

A single-player word-guessing game developed using Python.

Created a fun and engaging game that challenges players to guess words under limited attempts. This project honed my Python programming skills and introduced me to game development concepts.

Digital Restaurant Web App

Currently in development: A web application for a fully digital restaurant experience.

This innovative project allows customers to seamlessly order food from their tables using their mobile phones, eliminating the need for waiters. The app integrates user-friendly design with responsive web technologies to enhance the dining experience.
